

MIR3 CHAIR

The MiR3 Chair is a swivel office chair type gives you all options to furbish your modern workspace. Specifically built for workstations areas. The MiR3 chair has a wide range of options and combines clean lines with outstanding comfort and quality.

The MiR3 Chair features a complete range of technical functions and it is a perfect tool to furnish operative areas. The intuitive handling allows the user to adjust MiR3 to perfectly fit individual needs and preferences.

TECHNICAL FEATURES

Type	Ergonomic Swivel Office Chair.
Backrest	Mesh type. Wide and heavy duty framework made of nylon injection. The reinforced Y shape back element integrates the functional lumbar relief.
Lumbar support	Backrest equipped with integrated lumbar support, adjustable height and depth at each user's needs and preferences.
Chassis	Chair sustaining framework is in stainless steel, chromed or black coated.
Seat	Padded and upholstered Type. Generous Seat made of high quality moulded polyurethane foam, not deformable and injected at high density of 65kg/m ³ . CFC and CHC-free, upholstered seat is of 70mm thickness. Extremely comfortable, cover fabric firmly embraces the padding and is strongly fixed by the underneath plastic cover of 10mm thickness, distinguished by a "flatty" design. All-in-one seat.
Seat depth	Seat depth adjustment of 60 mm is applicable as optional to enable user to fix the optimal forward-to-back position and to access support from the chair back without cutting off circulation at knees.
Seat height	Pneumatic gas lift infinitely variable from 500 – 590 mm.
Armrests	Equipped with 3D multi-functional armrests – height by 60mm, depth and width. Soft Armpad injected in soft black polyurethane.
Mechanism	The synchro-tilt mechanism and the proper location of pivot points make MiR3 movement match or mirror the natural body movements of the chair user. Max angle of 125°. 4 lock positions system equipped with anti-shock function.
Weight adjustment	Infinitely adjustable to body weight of 45 – 140 kg by the use of underneath knob.
Headrest	Headrest applicable as optional.
Back upholstery	Breathable Elastic Mesh - 64% Polyester high tenacity and 36% PA - 320gr/lm – 100.000 Martindale cycles.
Seat Upholstery	Fabric 100% Polyester of 450 gr/lm and 50.000 Martindale cycles.
Base	Featuring Five star base in die-cast Polished Aluminium or Black Nylon.
Castors	Hard and Soft castors of Ø 60 mm are available respectively for soft and hard floors.
