

PAK CHAIR

The Pak Chair is a swivel office chair type with very comfortable seating for workstations, meeting and executive areas as well as for reception in the front office. Pak Chair is the perfect tool for the daily work, embracing total functionality with design.

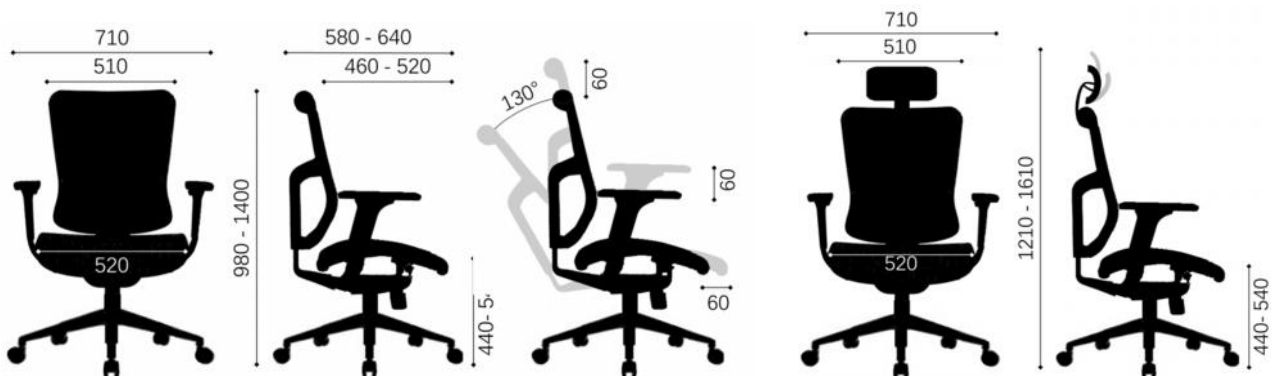

The Pak Chair offers the highest of the functionality, permanent flexibility and full transpiration thanks to the mesh type of upholstery applicable both to seat and back. Pak Chair reacts synchronously to the user's micro-movements.

TECHNICAL FEATURES

Type	Ergonomic Swivel Office Chair.
Backrest	Mesh type. Rounded shaped with softly flowing line. Injected nylon framework with central Y shape reinforcement. Equipped with snap lock mechanism of 60mm to allow height adjustment. Ergonomically shaped for lumbar relief.
Lumbar support	Backrest equipped with integrated snap lock mechanism by 60mm for lumbar support adjustment to reduce low back muscle tension.
Chassis	Chair sustaining framework in die-cast aluminium, polished finished.
Seat	Mesh Type. Rounded shaped. Injected reinforced nylon framework. Waterfall design with soft front padding absorber. The edge of the seat gradually curves down to eliminate knee and legs pressure.
Seat depth	Equipped with seat depth adjustment of 60 mm to enable user to fix the optimal forward-to-back position and to access support from the chair back without cutting off circulation at knees.
Seat height	Pneumatic gas lift infinitely variable from 425 – 525 mm. Self-supporting safety pneumatic spring.
Armrests	Armrest adjustable in 3 dimensions – height by 60mm, angle and depth.
ArmPad	Soft comfortable Armpad 30mm thickness of injected soft black polyurethane.
Armrest support	Die-cast aluminium – polished finished.
Mechanism	Synchronized body-float mechanism with line control system with a max angle of 130°. Multi- position locking system equipped with anti-shock function.
Weight adjustment	Infinitely adjustable to body weight of 45 – 140 kg by the use of underneath knob.
Headrest	Adjustable headrest in 2 dimensions – height and angle.
Upholstery	Fully Breathable Elastic Mesh for seat and back. Mesh made of 64% Polyester high tenacity and 36% PA - 450gr/lm – 100.000 Martindale cycles. Available in several colours with straight or waved design.
Base	Five star base in die-cast Polished Aluminium or Black Nylon.
Castors	Hard double castors of Ø 65 mm load-dependent braked, for soft floors.
